Quality Imaging Products “Inks” More Profits With Sage MAS 90

Quality Imaging Products (QIP) likes being first. Named by Inc. Magazine as one of America’s fastest-growing companies four years in a row, the toner and inkjet cartridge remanufacturing firm wanted to edge out its competitors in the world of e-commerce.

“Two years ago, we transformed the company from a technology-averse to a technology-rich environment,” says Martin Stein, president of QIP. “Although we’d had Sage MAS 90 ERP for years, we’d never taken advantage of its full functionality. Most processes were still paper-based and required double or triple checks for accuracy. So, with the help of our reseller, we made a significant cultural leap, upgrading to Sage MAS 90 as our centerpiece, making all communications electronic, and adding modules like Sage MAS 90 e-Business Manager, Sage MAS 90 StarShip Link, and Sage MAS 90 Return Merchandise Authorization (RMA). This let us launch our e-commerce strategy, improve front-office efficiencies and give our customers the services they asked for.”

More SKUs, Faster Fulfillment

Today QIP uses Sage MAS 90 to manage all operations, including manufacturing half a million toner cartridges a year, tracking 100 different product lines, managing an inventory of over 40,000 cartridges, and running a 30,000 square-foot state-of-the-art warehouse. Manual processes have been replaced with an end-to-end business system for everything from purchasing and payables to shipping. Integrated Inventory Management and Bill of Materials modules provide an accurate reading of how products are being used, and permit fine-tuning of inventory levels by SKU—essential for large customers who demand that their

CHALLENGE

Differentiate from competition on customer service, speed, and efficiencies through e-commerce and end-to-end system integration.

SOLUTION

Sage MAS 90 with full suite of modules, including e-Business Manager, StarShip Link, and Return Merchandise Authorization.

RESULTS

Order capacity increased by 100 percent, inventory turns by 10 percent, and overall business by 70 percent without corresponding increases in administrative staffing.

Your business in mind.

"Sage MAS 90 paid for itself in just a year. Business went up by 70 percent, ordering capacity increased by 100 percent, service levels improved by 15 percent, and order turns improved by 10 percent."

ABOUT SAGE SOFTWARE

Sage Software has been responding to the needs, challenges, and dreams of small and mid-sized businesses for over 25 years. With a complete range of business management solutions and services, Sage Software helps companies improve customer relationships, reduce costs, and automate and integrate a variety of operational activities. Its solutions support the specialty needs of a broad scope of industry segments, including manufacturing, distribution, construction, real estate, nonprofit, and professional services.

stock be maintained in separate SKU-based areas.

"Sage MAS 90 has let us decrease overall inventory levels while increasing service rates," explains Matthew McGregor, business manager. "Total SKUs have gone up from 130 to more than 500, something we could never have done without Sage MAS 90. We've refined our ordering patterns so we fulfill 99 percent of our same-day orders immediately."

"On an executive level, we have real-time data on activities throughout the organization, such as sales by product or customer, inventory levels and margins, which improves our decision-making and strategic planning."

B-to-B e-Commerce

QIP customers access e-Business Manager 24/7 to place orders, view photos of cartridges, review product descriptions and check open invoices and ordering history. Credit card processing is fully integrated too. "Our customers are some of the nation's largest private labelers and office supply retailers, and they're always looking for efficiencies," Stein notes. "They appreciate the convenience and time-savings of e-commerce, which few of our competitors can offer right now."

Orders go out through StarShip Link, a Sage MAS 90 module that automates shipping, maintains tracking information, and integrates tightly with both manufacturing and customer service. "By streamlining shipping operations, StarShip Link has allowed us to reassign two full-time employees to other positions, and makes it possible for customers to verify their own tracking data online," says McGregor.

The RMA module performs similar automation for returned merchandise. "Quality is the single most important differentiator in our industry, so we track

every return by customer, date, item type, and source of failure," comments McGregor. "We'd been spending 250 hours a month to do this on paper and spreadsheets. The RMA module will cut these hours and permit more sophisticated reports that verify our quality edge in the marketplace."

Has the new system been a wise move? "Sage MAS 90 paid for itself in just a year," says McGregor. Business went up by 70 percent, ordering capacity increased by 100 percent, service levels improved by 15 percent, and order turns improved by 10 percent. Employee morale and customer satisfaction are both up as well.

"Sage MAS 90 will continue to be a central element in our strategic vision, helping us define an ever-stronger competitive niche and illustrating that quality is not just in our name, but in everything we do."
